Proposal 1: Mthwana Logistics Website Project Proposal

1. Organization Overview

- **Name:** Mthwana Logistics
 - **Brief History:** Mthwana Logistics is a South African based start-up founded by Ntokozo Ntsika Mthwana. The company focuses on fuel transportation services, specializing in safe and efficient delivery of petroleum products to businesses and retail stations. While still in its growth phase, the company aims to establish a strong presence in the logistics and energy transport sector.
 - **Mission:** To deliver petroleum products safely, on time, and with the highest standards of professionalism.
 - **Vision:** To be a trusted leader in fuel transportation across Southern Africa, known for reliability, innovation and client satisfaction.
 - **Target Audience:** The website will target fuel station owners, petroleum suppliers, industrial clients and potential partners.
-

2. Website Goals and Objectives

- **Goals:**
 - To build an online presence for Mthwana Logistics.
 - To showcase the company's services and professional standards.
 - Generate client leads through an enquiry/contact form.
 - Visual media.
 - **Key Performance Indicators (KPIs):**
 - Number of monthly enquiries submitted via the website.
 - Website traffic growth rate.
 - Client conversion rate from website leads.
-

3. Strengths and Weaknesses

Strengths

- The website has a clear structure as I have separated the webpages instead of putting everything in one page. This has made it look professional.
- Users can easily move between pages.

- With a clean and well-organized code of this website, I can easily add CSS and JavaScript later on.

Weaknesses

- The website looks very plain because it doesn't have CSS, it does not look appealing to the eye.
 - The contact form looks functional but doesn't actually send data anywhere because it needs JavaScript.
-

4. Proposed Website Features and Functionality

- **Homepage:** Company introduction, images of fuel trucks, service highlights.
 - **About Us:** Founders story, mission, and vision.
 - **Services:** Detailed description of fuel transportation offerings.
 - **Enquiry:** Form for quotation requests, service booking, or partnership opportunities.
 - **Contact:** Company contact details, map with multiple service regions.
-

5. Design and User Experience

- **Colour Scheme:** Orange and black.
 - **Typography:** Aptos font will be used for body text, with bold sans-serif headings.
 - **Layout:** The website will have a clean, structured layout with a top navigation bar, clear call-to-action buttons in orange, and section highlights in black backgrounds for contrast.
 - **User Experience:** The design will be responsive, ensuring easy navigation on desktops, tablets, and mobile devices. Pages will include consistent branding elements such as truck images, service highlights, and enquiry buttons in bright orange for visibility.
-

6. Technical Requirements

- **Hosting & Domain:** The website will use a South African hosting provider with good uptime. The domain name will be **mthwanalogistics.co.za**.
 - **Languages & Frameworks:** HTML, CSS, and JavaScript will be used for front-end development. PHP may be applied for form submission.
-

7. Timeline and Milestones

- 3 Days: Research, planning, wireframe design.
 - 1 Week: Development of homepage, product pages, and backend integration.
 - 5 Days: Testing and bug fixing.
 - 1 Week: Final review and launch.
-

8. Budget Estimate

- Development: R8 000 – R12 000
 - Hosting and Domain: R1 200
 - Ongoing Maintenance: R300 per month
-

Proposal 2: POLO Ralph Lauren Website Project Proposal

1. Organization Overview

- **Name:** POLO Ralph Lauren
 - **Brief History:** Founded in 1967 by Ralph Lauren, POLO Ralph Lauren has become a global leader in premium fashion and lifestyle products. Known for its classic American style, the brand offers apparel, accessories, and home goods worldwide.
 - **Mission:** To provide timeless, high-quality apparel and lifestyle products that celebrate individuality and elegance.
 - **Vision:** To be the leading luxury lifestyle brand recognized for quality, authenticity, and innovative style.
 - **Target Audience:** Fashion-conscious men and women aged 18-45, with middle to high income, seeking premium and classic style.
-

2. Website Goals and Objectives

- **Goals:**
 - Increase online sales by improving user journey and product visibility.
 - Enhance brand storytelling to connect with customers emotionally.
 - Offer seamless omni-channel experience integrating online and physical stores.
 - **Key Performance Indicators (KPIs):**
 - 20% growth in e-commerce sales within 6 months.
 - Increase average session duration by 15%.
 - Boost newsletter subscriptions by 25%.
 - Improve mobile conversion rates by 30%.
-

3. Current Website Analysis

- **Strengths:**
 - Strong, consistent branding and premium aesthetics.
 - Rich product imagery and detailed descriptions.
 - Integrated loyalty and promotional offers.
- **Weaknesses:**
 - Navigation can be overwhelming due to extensive product lines.

- The checkout process can be simplified to reduce cart abandonment.
 - Limited personalized product recommendations.
 - **Areas for Improvement:**
 - Streamline navigation with clearer categories and filters.
 - Simplify checkout flow.
 - Add AI-powered product recommendations.
-

4. Proposed Website Features and Functionality

- Dynamic homepage with seasonal campaigns and featured collections.
 - About Us section with brand heritage and craftsmanship stories.
 - Product catalog with filtering by size, color, collection, and price.
 - Integrated store locator with map and multiple locations.
 - Customer account dashboard for order tracking and loyalty points.
 - Contact page with enquiry form and customer support chat.
 - Blog highlighting fashion trends, styling tips, and brand news.
-

5. Design and User Experience

- **Colour Scheme:** Classic navy blue (#003366), white, and accents of gold for luxury feel.
 - **Typography:** Elegant serif fonts for headings (e.g., Georgia), clean sans-serif for body (e.g., Arial).
 - **Layout:** Clean, minimalist with a focus on large product visuals and easy navigation.
 - **User Experience:** Mobile-first design, intuitive menus, quick product search, and smooth checkout.
 - **Wireframe:** Low-fidelity wireframe features a large hero banner, top navigation bar with dropdowns, product grid, and footer with contact info and social links.
-

6. Technical Requirements

- Hosting on scalable cloud infrastructure with CDN support.
 - Technologies: HTML5, CSS3, JavaScript (React for dynamic UI), integration with e-commerce backend (Shopify or custom).
 - Secure payment processing, GDPR compliance, and fast mobile load times.
-

7. Timeline and Milestones

- Week 1-2: Research, wireframing, and sitemap development.
- Week 3-6: Frontend and backend development, product page creation.
- Week 7: Testing and quality assurance.

- Week 8: Launch and post-launch support.
-

8. *Budget Estimate*

- Development: R18,000
 - Hosting and maintenance (annual): R2,500
 - Content creation and marketing: R4,000
-
